

## Local Unit Statistics Worksheet

**Directions:** Complete the worksheet with estimates of what you believe the correct values to be for your local unit. Then, using the *U.S. Census Bureau QuickFacts* for your county/counties, record the actual statistics. (See <http://quickfacts.census.gov/qfd/index.html>). How do the values compare?

County/District	County		County		County		County		District
	Est.	Actual	Est.	Actual	Est.	Actual	Est.	Actual	Total
1. What was the county population according to the latest census?									
2. How has this population changed?									
3. What percentage of the population is under 18 years?									
4. What percentage of the population is over 65 years?									
5. What percentage of the population is female?									
6. What percentage of the population is:									
White?									
Black?									
American Indian?									
Asian?									
Hispanic or Latino?									
7. What percentage of residents spoke a language other than English at home (age 5+)?									
8. What percentage of the over-25 population graduated from high school?									
9. What percentage of the over-25 population has a bachelor's degree or higher?									
10. What is the median household income?									
11. What percentage of residents have income below poverty level?									
12. How many persons are there per square mile?
