

Dan Mosier II, Wildcat District, SEAC Nominee

I am a life long resident of Kansas, born in Pittsburg, KS, raised in Lansing, KS. I attended Pittsburg State University, earning a B.S and M.S. in Field Biology specializing in aquatic sciences. I have been employed by Kansas Wildlife, Parks & Tourism for the past 34 years at Farlington Fish Hatchery. First as a Fish Culturist and currently as the Fish Hatchery Manager. My wife Roz and I have 2 boys, Danny and Fisher, who are currently off to universities. My daughter, Veronica, is

a pediatrician in Indianapolis. We live on a rural hobby ranch raising chickens, rabbits and honeybees and enjoy organic gardening, SCUBA diving, and being outdoors.

My wife and I are both involved with local 4-H programs. She as a Community Club leader and I as a 4-H Shooting Sports instructor for Archery, Rifle and Pistol. I am also involved with Kansas 4-H Shooting Sports at the State level having served on several iterations of State Committees including Chairing some of those committees. Currently, I am the Chair for the Kansas 4-H Archery Steering Group. I am also co-chair of the Wildcat District 4-H PDC.

I have been a board member with Wildcat Extension District (WED) since its inception 8 or so, years ago and was a board member on the Crawford County Extension 2+ years prior to that. I currently serve as First Past Chairperson of WED, having served as Chairperson for 3.5 years prior and Vice Chair for a year prior to that. For the past nearly 10 years I have also been representing Kansas as part of another USDA-NIFA Extension project called the North Central Regional Aquaculture Center (NCRAC). During that time, I have been serving as Vice President of the NCRAC Industry Advisory Council and as such serve on the NCRAC Board of Directors.

My goals for Extension are to support the current programs especially the youth education area (4-H). In addition, I think it's important to provide increased attention to underserved constituents such as sustainable crop and livestock producers.
