Norton County Community Foundation

COVID-19 Response

- Phase 1: Non-profit and Charitable Organization Support
  - Charity Needs Assessment
  - Emergency Grant Funding Program

- Phase 2: Community Engagement and Economic Support
  - #NorCoBingo
Norton County Community Foundation

Phase 1: Non-profit and Charitable Organization Support

- Charity Needs Assessment Survey
  - Goal: understand the operational and support needs of nonprofit organizations
  - Google Form
  - Distributed via email, social media, and website (COVID-19 page)
Norton County Community Foundation

Phase 1: Non-profit and Charitable Organization Support

- Emergency Grant Funding Program
  - Goal: respond to the short and long-term challenges that Norton County nonprofits and charitable organizations are facing due to COVID-19
  - Google Form
  - Publicize via email, social media, website (COVID-19 page), press release, radio interview, and newspaper article

- Qualifications
  - Opportunity to contribute to the fund via GNWKCF’s Neighbor Helping Neighbor Fund
  - Grant committee votes weekly via Zoom
Phase 2: Community Engagement and Economic Support

#NorCoBingo

Goal: promote community engagement and support local economy

Game logistics:

- Bingo card tasks encourage players to get outside, enjoy their community, and do acts of kindness for others (all while observing social distancing guidelines).
- Participants must post 3 photos to social media with the hashtag #NorCoBingo.
- Once a Bingo is complete, participants fill out an entry form on our website.
- Winners receive $100 in Bingo Bucks (Chamber Bucks), which they are encouraged to use at a business struggling as a result of COVID-19. Must be used by June 30, 2020.

Promote via social media, email, website, press release, radio ads, front page newspaper story
#NorCoBINGO

- #NorCoBingo
- Enjoy the activities and games, get outside, and explore new places in Norton County while adhering to social distancing rules.
- Once you have a Bingo, enter to win at www.nortoncof.org/norcobingo
- Entries will be validated by your use of #NorCoBingo on your social media page. Post three photos per entry with the tag #NorCoBingo.
- Each person can get up to 10 Bings per card, which equals 10 entries into the drawing. Once you are entered, your name will stay in the drawing.
- Three winners every day will be drawn to win $100 Bingo Bucks!
- Individuals can only win once. Every person in your household is eligible to win.
- Bingo Bucks (aka Chamber Bucks) can be picked up at the Chamber office at 205 S 32nd Street in Norton.
- All Bingo Bucks MUST BE USED BY JUNE 30, 2020.
- Drawings will be done each day at 5:00 PM. Winners will be posted on www.nortoncof.org/norcobingo and on WCIF social media pages.
- Facebook, Instagram, and Twitter
- Drawings will begin Saturday, April 15 and go through Memorial Day.
- We encourage winners to use Bingo Bucks quickly to help drive our local economy! Think about friends who have had to adjust their business style during this time of quarantine. How can you help?
Best practices for safety of retail products, store and staff after re-opening

Based on our current scientific understanding

Photo Credit: CDC
Overview

• Health and safety of staff after re-opening
• Safety of customers
• Safety of products
• Resources available
• Coronaviruses- generally spread person-to-person through respiratory droplets.
• Currently NO evidence that COVID-19 is transmitted through food or food packaging.
• May be possible to get COVID-19 by touching surface/object with virus on it and then touching mouth, nose, or possibly eyes — Not thought to be the main way the virus spreads.
Re-opening after COVID

• Learn: ensure you are following all guidance (particularly local public health dept)
• Listen: to workers and customers on their concerns
• Communicate: plans with workers, stakeholders, customers
• Evaluate and implement
  – Consider using a 3-phase approach to re-opening
    • 1) Minimal re-opening
    • 2) Re-opening with physical distancing
    • 3) Return to (new) normal
Protecting health of staff

• Avoid close contact with others as much as possible (social distancing)
  – From other workers, delivery people, customers, etc

• Provide handwashing stations and encourage frequent handwashing
  – WHEN: particularly after blowing nose, coughing or sneezing, before eating or drinking (and after using restroom, before handling food)
    • Don’t touch eyes, nose, mouth with un-washed hands
  – HOW: use soap and water, for at least 20 seconds
    • "Normal" soap is fine
Proper hand washing

1. Wet hands
2. Use liquid soap
3. Lather, rub and count to 20
4. Rinse
5. Towel or air dry hands
6. Turn off taps with towel or your sleeve
Protecting health of staff

• Actively encourage sick employees to stay home!!
• Provide PPE (cloth face coverings, gloves, etc) to workers and training on how to use
• Provide tissues and trash cans
• Plexi-glass shields for cashiers
  – No-cash payments if possible (ideally remote)
• Other modifications- specific to industry
  – Ex: restaurants- space out tables/chairs/block some booths
  – May have corporate guidance also
Protecting customer health

• Retail stores: disinfect cart handles
• Encourage customers not to come if sick
• Provide sanitizing wipes for customers
• Remind customers of social distancing
  – Put marks on floor for check-out areas
• Monitor number of people in building
• Clean and stock bathrooms more frequently
• Clean frequently touched surfaces often
  – Door handles, shelves, credit card terminal
Safety of your products

• Encourage customers to “look at our products with your eyes, not your hands”

• Not well known how long coronavirus stays on surfaces

• Increase cleaning
  – Clean and disinfect store shelves, handles, etc
• If surfaces are dirty, clean with a detergent or soap and water prior to disinfection.

• Disinfect: EPA-approved product list against coronavirus:
  

  – Follow the manufacturer’s instructions (e.g., concentration, application method, contact time, etc)
  – Bleach: 5 T bleach/ 1 gallon water

- KDHE, local public health dept
- Local authorities
- Trade association guidance
Food Safety and COVID-19

This website is to be a one-stop resource for information related to food safety and the COVID-19 pandemic. Please know this site will be updated frequently as more information is available.

According to the Centers for Disease Control and Prevention

Coronaviruses are generally thought to be spread from person-to-person through respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with food. Before preparing or eating food it is important to always wash your hands with soap and water for 20 seconds for general food safety. Throughout the day wash your hands after blowing your nose, coughing or sneezing, or going to the bathroom.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.
