UNLOCK THE POTENTIAL IN YOUR HERD
Energy and Natural Resources
Artificial Photosynthesis
Liquid Sunlight
3D Printed Solar Trees
Wildlife and Natural Conservation
Facial Recognition for Fish
Batteries that run on blood
Supply Chain Growth
How will we get from here to there?
Who can be your Venture Capitalist of Ideas?
The world is talking about innovation, and ingenuity, and resilience. What we know is that all of those things are cooked into the DNA of rural people.

We’ve HAD to be resourceful, we’ve HAD to be resilient, we’ve HAD to innovate because we’ve needed to do those things to survive and we haven’t had access to the same resources and supports found in our urban centres.
